University of Niš Faculty of Medicine	Study program: INTEGRATED ACADEMIC STUDIES OF MEDICINE ACCREDITATION 2018	
Course: Anesthesiology	y with reanimation	
Course head: Prof. dr Ra	admilo Janković	
Course status:	Elective	
Semester: X	Study year: V	
ECTS: 3	Course code: M-V-43	
Course purpose:		
will also learn about ba	procedures in the treatment of shock, water and electrolyte asics of respiratory reanimation support, functioning of r ne pillars of modern reanimation therapy. vledge, skills, attitudes)	-
placement of central ver will be able to place na perform parenteral and	ature doctors will be able to place peripheral venous access nous access and perform parenteral fluid replacement. In a asogastric suction, be involved in the placement of enteral enteral nutrition of terminally ill patients. They will also be a disorders and to react using most appropriate therapoute	ddition, future doctors probes, being able to able to recognize basic
placement of central ver will be able to place na perform parenteral and acid-base and electrolyte	nous access and perform parenteral fluid replacement. In a sogastric suction, be involved in the placement of enteral enteral nutrition of terminally ill patients. They will also be e disorders and to react using most appropriate therapeutic	ddition, future doctors probes, being able to able to recognize basic
placement of central ver will be able to place na perform parenteral and acid-base and electrolyte No. of classes of active	nous access and perform parenteral fluid replacement. In a sogastric suction, be involved in the placement of enteral enteral nutrition of terminally ill patients.
